

# COVID-19 Treatment Telehealth Program

Free online consultation and prescription services for COVID-19 antiviral medications now available to Wisconsin residents from the comfort of their own home.

## What is Wisconsin's COVID-19 Telehealth Program?

Wisconsin's COVID-19 Treatment Telehealth Program provides free, easy access for Wisconsinites to health care consultation, screening, and prescriptions for COVID-19 oral antiviral treatments. Antiviral treatment is for people with mild to moderate COVID-19 who are within 5 days of symptom onset. These treatments can help reduce the chance for severe disease and prevent hospitalization. If treatment is prescribed by a clinician during a telehealth visit, residents can choose to have their prescription made available for pickup at any of the more than 600 pharmacies throughout the state that carry the medications. If a resident doesn't have access to one of these pharmacies, the service will ship the medicine to their residence overnight. Insurance is not required, and this service is available in a wide variety of languages.

## Who is eligible?

Wisconsin residents ages 18 and older who test positive for COVID-19 will be able to use the service to receive a video or telephone consultation with a health care clinician.

## How it works

Before getting started, make sure you have:

- A list of medications, supplements, or vitamins you are taking.
- A copy of your lab results within the last 3 months if you have kidney disease.

Next, go to [color.com/covid-19-treatment-wi](https://color.com/covid-19-treatment-wi), scan the QR code below, or call 833-273-6330 and tell us about your symptoms

Join the video or telephone call to begin your consultation session

If you're prescribed antiviral treatment, pick it up at your local pharmacy or have it overnight mailed to your residence.

**Clinicians are available every day  
from 8 a.m. to 8 p.m. CT.**
