2025 Native Plant Sale Order Form

Barron County's native plant sale is aimed at aiding property owners in beautifying their property. Native plants aid in habitat restoration, restoring a prairie, or creating a beautiful lakeshore habitat. These are super hardy, drought-tolerant, and pest-resistant native perennials. They handle plenty of neglect while providing loads of flowers that will attract bees, butterflies and birds throughout the summer. Plants in each collection are selected by the nursery based on the growing season. All of the plant options are within their native ranges.
